Abstract

In the present study, the effect of non-Persian learners' creativity in their ability to recognize some metaphorical (dead and new) and literal sentences has been investigated. For this purpose, twenty-two advanced-level learners from Language Learning Centre of Imam Khomeini International University (IKIU) took the Creativity Test and Persian Metaphor Recognition Test. The results of data analysis showed a significant association between creativity and the recognition of Persian metaphorical sentences. Although learners' creativity is significantly related to their ability to recognize dead
